Professional Summary

Aspiring Front-End Developer with a strong foundation in HTML, CSS, JavaScript. Passionate about creative problem-solving and building intuitive, responsive user experiences. Eager to contribute technical skills to a collaborative team while leveraging a growth mindset to deliver high-quality, user-centric web solutions.

Skills

Programming & Web Technologies : HTML, CSS, Javascript, Java

Framework & Database: React, Bootstrap, Tailwind CSS, MongoDB

Tools: VSCode, eclipse, IntelliJ IDEA, Ubuntu, Git, Github, Clerk, Excel

Education

B.E. Computer Science and Engineering

Erode Sengunthar Engineering College

Graduated: 2025

CGPA: 7.10 / 10

Experience

NCR Atleos

Data Warehouse Engineer

Feb 2025 – Dec 2025

Remote

- Specialized in integrating ERP modules with data warehousing systems to ensure seamless data flow and integrity.
- Developed robust data pipelines and utilized SQL and Excel for ETL testing and data analysis.
- Designed multipage Power BI dashboards with slicers to help stakeholders drill down by region and product.

Projects

Movie Ticket Booking

Repo | Live Demo

Technologies: MERN Stack | Tailwind CSS | TMDB API | Stripe API | Inngeist

- Developed a full-stack movie ticketing application with secure user authentication and account management using Clerk
- Implemented robust database management using MongoDB to handle user data, dynamic showtimes, and real-time seat availability efficiently.
- Integrated TMDB API to automatically fetch and display current movie releases, cast details, and ratings dynamically.
- Designed and built a responsive, modern UI using React and Tailwind CSS, featuring an interactive seat selection and secure Stripe checkout flow.

Weather - Weather Forecast

Repo | Live Demo

Technologies: HTML | CSS | JavaScript | OpenWeatherMap API

- Built a dynamic weather dashboard that provides users with instant, accurate, real-time forecast data by integrating a third-party weather API.
- Enhanced the user visual experience by writing conditional rendering logic that programmatically updates weather condition icons (rain, clouds, clear, etc.) based on live API responses
- Created a responsive search interface, optimizing the application's layout using modern CSS techniques for seamless viewing across all desktop and mobile devices.

Certifications

- Deloitte Data Analytics Certificate | Tableau and Data Visualization (2026)
- Infosys Springboard | Basics of Python (2024)
- NPTEL | Foundation of Cloud, IoT, Edge, and ML (2024)
